

VNR 446

- **USPs**
 - Early hybrid
 - Good yielder
 - DG, high Tuffness with high Pungency
 - Length around 9-10 cm with Dia of 0.9-1 cm
 - Moderately tolerance to LCV in DS sowing window
- **Sowing window**— Oct- Nov and 2nd May-June
- **Targeted Geography**- WUP for DS and EUP for WS while best suited window is DS (Oct –Nov)
- **Targeted Segment**— DG med thin like- Pride, 60-13
- **Advisory**— Avoid high virus pressure area like early sowing window of EUP

VNR 357

- **USPs**

- Mid Early hybrid
- Good yielder
- DG, high Tuffness with high Pungency
- Length around 11-13 cm with Dia of 1-1.1 cm
- Moderately tolerance to LCV
- Moderate cold set

- **Sowing window**— June -July

- **Targeted Geography**- EUP & CUP for WS

- **Targeted Segment**- DG med thick- NS 1701/NS 3572

- **Advisory**— 1st picking yield is low.

VNR 42

USPs

- Early with High yield potential
- Early Bulker
- Attractive DG, glossy smooth fruits with good uniformity,
- Moderate Heat wave tolerance
- Fruit quality is very good.

Sowing window: Oct-Nov and May-July

Targeted Geography- UP,PB,HR

Targeted segment/Check: Raja 22/Med long hybrids

Advisory: Use good fertigation after 7-8 pickings for longevity,

Also avoid high Foliar disease prone area

VNR 52

USPs

- Early with High yield potential
- Early Bulker
- Attractive DG, glossy smooth fruits with good uniformity,
- Moderate Heat wave tolerance
- Moderate foliar disease tolerance

Sowing window: Oct-Nov and May-July

Targeted Geography- UP

Targeted segment/Check: Prachi

Advisory: Use good fertigation after 7-8 pickings for longevity,
