Total Qty (Kgs)			2641996

- 1) This year I planned the raw maize seeds unload at VNR plant and Custom processing plant directly from Dryer due to this we saved local transportation cost, cold storage charges and hamali charges near about 3 lakh this is the big achievement for me.
- 2) This year I Planned the raw seed arrival tuck distributed to cold storage variety wise.
- 3) We unload the arrival truck without any halting.
- 4) We maintain the accurate unloading sheet for data entry purpose.
- 5) We solve the issue of shortage bag with production staff by proper communication.
- 6) We are loaded raw seed as well as condition seed to Raipur (485Mt) without any mistake.
- 7) We fulfill the requirements of seed for processing and packing purpose without any delay in VNR Plant As well as ABL Bioscience processing plant.

- 8) Cowpea raw seed and condition bulk seed loaded from cold storage without any mistake.
- 9) Properly sorted the discard seed at the time of unloading at plant due to this we save the hamali charges.
- 10) Properly planned and managed hamali at plant as well as ABL plant.
- 11) Properly communicated to QA Staff for GOT and Germ Result.
