# New product Cucumber 119025(Sana) and 119028(Purva)

## Feedback 119025 (Sana)

High vine vigor, heavy branching, mottle green to dark green straight fruits, sweet and crispy in taste, high yielder but late hybrid (But if March sowing window, fruiting with check but first two picking low yield then high yielding), farmers like their shape color ,uniformity and yield.

## Feedback 119028 (Purva)

High branching, Med early, whitish green strength short fruits, high fruit uniformity till last picking, good fruit taste and high yield, Good crop longevity, suitable for rainy and desi market.

# New product Chilli 1281356(Nutan) and Okra 120319(VBH11), Bitter gourd Manas(78363)medium, Shahi(78389) small.

## Feedback 1281356(Nutan)

Semi erect strong plant canopy, Semi wrinkle dark green fruits, Earliness, High toughness and high pungency, good virus tolerance, and high yield.

## Feedback 78363(Manas)

Medium high vigor, Earliness, good disease tolerance (DM,PM), Dark green shiny fruits, Sharp non breakable spines, High fruits uniformity and High yield, Medium segment target against Pragati(EW).

## Feedback 120319(VBH11)

Narrow cut leaf, good fruit quality, slightly seeds appearance, easy picking against check(Radhika), In field conditions performing very convenient to the farmers, in the sense of Easy pest control due to narrow cut leaf, and complete picking means fruits easy to see for picking, high yielding

## Feedback 78389(Shahi)

High vine vigor, Early bulker, sharp and non breakable thick fruits, low shed effect (if sowing non staking) Good fruits uniformity and fruits wt., Good transportation and storage capacity, high yield but medium crop longevity.
